Section 1  Chemical Product and Company Identification

PRODUCT NAME: CAIROX® potassium permanganate, KMnO₄
SYNONYMS: Permanganic acid potassium salt
Chameleon mineral
Condy's crystals
Permanganate of potash

TRADE NAME: CAIROX® potassium permanganate

TELEPHONE NUMBER FOR INFORMATION: 815/223-1500

EMERGENCY TELEPHONE NO: 800/435-6856

MANUFACTURER'S NAME: CARUS CHEMICAL COMPANY
MANUFACTURER'S ADDRESS: Carus Chemical Company
1500 Eighth Street
P. O. Box 1500
LaSalle, IL 61301

CHEMTREC TELEPHONE NO: 800/424-9300

Section 3  Hazards Identification

1. **Eye Contact**
   Potassium permanganate is damaging to eye tissue on contact. It may cause severe burns that result in damage to the eye.

2. **Skin Contact**
   Contact of solutions at room temperature may be irritating to the skin, leaving brown stains. Concentrated solutions at elevated temperature and crystals are damaging to the skin.

3. **Inhalation**
   Acute inhalation toxicity data are not available. However, airborne concentrations of potassium permanganate in the form of dust or mist may cause damage to the respiratory tract.

4. **Ingestion**
   Potassium permanganate, if swallowed, may cause severe burns to mucous membranes of the mouth, throat, esophagus, and stomach.
**Section 4 First Aid Measures**

1. **Eyes**
   Immediately flush eyes with large amounts of water for at least 15 minutes holding lids apart to ensure flushing of the entire surface. Do not attempt to neutralize chemically. Seek medical attention immediately. Note to physician: Soluble decomposition products are alkaline. Insoluble decomposition product is brown manganese dioxide.

2. **Skin**
   Immediately wash contaminated areas with large amounts of water. Remove contaminated clothing and footwear. Wash clothing and decontaminate footwear before reuse. Seek medical attention immediately if irritation is severe or persistent.

3. **Inhalation**
   Remove person from contaminated area to fresh air. If breathing has stopped, resuscitate and administer oxygen if readily available. Seek medical attention immediately.

4. **Ingestion**
   Never give anything by mouth to an unconscious or convulsing person. If person is conscious, give large quantities of water. Seek medical attention immediately.

**Section 5 Fire Fighting Measures**

**NFPA* HAZARD SIGNAL**

<table>
<thead>
<tr>
<th>Hazard</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Health Hazard 1</td>
<td>Materials which under fire conditions would give off irritating combustion products. Materials which on the skin could cause irritation.</td>
</tr>
<tr>
<td>Flammability Hazard 0</td>
<td>Materials that will not burn.</td>
</tr>
<tr>
<td>Reactivity Hazard 0</td>
<td>Materials which in themselves are normally stable, even under fire exposure conditions, and which are not reactive with water.</td>
</tr>
<tr>
<td>Special Hazard OX</td>
<td>Oxidizer</td>
</tr>
</tbody>
</table>

*National Fire Protection Association 704

**FIRST RESPONDERS:**

**FLASHPOINT**

None

**FLAMMABLE OR EXPLOSIVE LIMITS**

Lower: Nonflammable  Upper: Nonflammable

**EXTINGUISHING MEDIA**

Use large quantities of water. Water will turn pink to purple if in contact with potassium permanganate. Dike to contain. Do not use dry chemicals, CO₂, Halon® or foams.

**SPECIAL FIREFIGHTING PROCEDURES**

If material is involved in fire, flood with water. Cool all affected containers with large quantities of water. Apply water from as far a distance as possible. Wear self-contained breathing apparatus and full protective clothing.
Section 6  Accidental Release Measures

STEPS TO BE TAKEN IF MATERIAL IS RELEASED OR SPILLED
Clean up spills immediately by sweeping or shoveling up the material. Do not return spilled material to the original container. Transfer to a clean metal drum. EPA banned the land disposal of D001 ignitable waste oxidizers. These wastes must be deactivated by reduction. To clean floors, flush with abundant quantities of water into sewer, if permitted by Federal, State, and Local regulations. If not permitted, collect water and treat chemically (Section 13).

PERSONAL PRECAUTIONS
Personnel should wear protective clothing suitable for the task. Remove all ignition sources and incompatible materials before attempting clean-up.

Section 7  Handling and Storage

WORK/HYGENIC PRACTICES
Wash hands thoroughly with soap and water after handling potassium permanganate, and before eating or smoking. Wear proper protective equipment. Remove contaminated clothing.

VENTILATION REQUIREMENTS
Provide sufficient area or local exhaust to maintain exposure below the TLV-TWA.

CONDITIONS FOR SAFE STORAGE
Store in accordance with NFPA 430 requirements for Class II oxidizers. Protect containers from physical damage. Store in a cool, dry area in closed containers. Segregate from acids, peroxides, formaldehyde, and all combustible, organic or easily oxidizable materials including anti-freeze and hydraulic fluid.

Section 8  Exposure Controls/Personal Protection

RESPIRATORY PROTECTION
In the case where overexposure may exist, the use of an approved NIOSH-MSHA dust respirator or an air supplied respirator is advised. Engineering or administrative controls should be implemented to control dust.

EYE
Faceshield, goggles, or safety glasses with side shields should be worn. Provide eye wash in working area.

GLOVES
Rubber or plastic gloves should be worn.

OTHER PROTECTIVE EQUIPMENT
Normal work clothing covering arms and legs, and rubber or plastic apron should be worn.
Section 9  Physical and Chemical Properties

APPEARANCE AND ODOR Dark purple solid with a metallic luster, odorless
BOILING POINT, 760 mm Hg Not applicable
VAPOR PRESSURE (mm Hg) Not applicable
SOLUBILITY IN WATER % BY SOLUTION 6% at 20°C (68°F), and 20% at 65°C (149°F)
PERCENT VOLATILE BY VOLUME Not volatile
EVAPORATION RATE (BUTYL ACETATE=1) Not applicable
MELTING POINT Starts to decompose with evolution of oxygen (O₂) at temperatures above 150°C (302°F). Once initiated, the decomposition is exothermic and self-sustaining.
OXIDIZING PROPERTIES Strong oxidizer
SPECIFIC GRAVITY 2.7 @ 20°C (68°F)
VAPOR DENSITY (AIR=1) Not applicable

Section 10  Stability and Reactivity

STABILITY Under normal conditions, the material is stable.
CONDITIONS TO AVOID Contact with incompatible materials or heat (>150°C/302°F).
INCOMPATIBLE MATERIALS Acids, peroxides, formaldehyde, anti-freeze, hydraulic fluids, and all combustible organic or readily oxidizable inorganic materials including metal powders. With hydrochloric acid, toxic chlorine gas is liberated.
HAZARDOUS DECOMPOSITION PRODUCTS When involved in a fire, potassium permanganate may liberate corrosive fumes.
CONDITIONS CONTRIBUTING TO HAZARDOUS POLYMERIZATION Material is not known to polymerize.

Section 11  Toxicological Information

Potassium permanganate: Acute oral LD₅₀ (rat) = 780 mg/kg Male (14 days); 525 mg/kg Female (14 days)
The fatal adult human dose by ingestion is estimated to be 10 grams. (Ref. Handbook of Poisoning: Prevention, Diagnosis & Treatment, Twelfth Edition)

EFFECTS OF OVEREXPOSURE
1. Acute Overexposure
   Irritating to body tissue with which it comes into contact.
2. Chronic Overexposure
   No known cases of chronic poisoning due to potassium permanganate have been reported. Prolonged exposure, usually over many years, to heavy concentrations of manganese oxides in the form of dust and fumes, may lead to chronic manganese poisoning, chiefly involving the central nervous system.
3. Carcinogenicity
   Potassium permanganate has not been classified as a carcinogen by OSHA, NTP, IARC.
4. Medical Conditions Generally Aggravated by Exposure
   Potassium permanganate will cause further irritation of tissue, open wounds, burns or mucous membranes.

Registry of Toxic Effects of Chemical Substances
RTECS #SD6476000
Section 12  Ecological Information

Entry to the Environment

Potassium Permanganate has a low estimated lifetime in the environment, being readily converted by oxidizable materials to insoluble manganese dioxide (MnO₂).

Bioconcentration Potential

In non-reducing and non-acidic environments manganese dioxide (MnO₂) is insoluble and has a very low bioaccumulative potential.

Aquatic Toxicity

Rainbow trout, 96 hour LC₅₀: 1.8 mg/L
Bluegill sunfish, 96 hour LC₅₀: 2.3 mg/L

Section 13  Disposal Consideration

DEACTIVATION OF D001 IGNITABLE WASTE OXIDIZERS BY CHEMICAL REDUCTION

Reduce potassium permanganate in aqueous solutions with sodium thiosulfate (Hypo), or sodium bisulfite or ferrous salt solution. The thiosulfite or ferrous salt may require some dilute sulfuric acid to promote rapid reduction. If acid was used, neutralize with sodium bicarbonate to neutral pH. Decant or filter, and mix the sludge with sodium carbonate and deposit in an approved landfill. Where permitted, the sludge can be drained into sewer with large quantities of water. Use caution when reacting chemicals. Contact Carus Chemical Company for additional recommendations.

Section 14  Transport Information

U. S. DEPARTMENT OF TRANSPORTATION INFORMATION:

Proper Shipping Name: 49 CFR 172.101 ................... Potassium Permanganate
ID Number: 49 CFR 172.101 ................... UN 1490
Hazard Class: 49 CFR 172.101 ................... Oxidizer
Division: 49 CFR 172.101 ................... 5.1
Packing Group: 49 CFR 172.101 ................... II

Section 15  Regulatory Information

TSCA
Listed in the TSCA Chemical Substance Inventory

CERCLA
Hazardous Substance

Reportable Quantity: RQ - 100 lb 40 CFR 116.4; 40 CFR 302.4

RCRA
Oxidizers such as potassium permanganate meet the criteria of ignitable waste. 40 CFR 261.21

SARA TITLE III Information

Section 302  Extremely hazardous substance: Not listed
Section 313/312  Hazard categories: Fire, acute and chronic toxicity
Section 313  CAIROX® potassium permanganate contains 97% Manganese Compound as part of the chemical structure (manganese compounds CAS Reg. No. N/A) and is subject to the reporting requirements of Section 313 of Title III, Superfund Amendments and Reauthorization Act of 1986 and 40 CFR 372.
## Section 15 Regulatory Information (cont.)

### STATE LISTS
- Michigan Critical Materials Register: Not listed
- California Proposition 65: Not listed
- Massachusetts Substance List: 5 F8
- Pennsylvania Hazard Substance List: E

### FOREIGN LISTS
- Canadian Domestic Substances List (DSL): Listed
- Canadian Ingredient Disclosure List: Listed
- European Inventory of Existing Chemical Substances (EINECS): 2317603

## Section 16 Other Information

- NIOSH: National Institute for Occupational Safety and Health
- MSHA: Mine Safety and Health Administration
- OSHA: Occupational Safety and Health Administration
- NTP: National Toxicology Program
- IARC: International Agency for Research on Cancer
- TSCA: Toxic Substances Control Act
- CERCLA: Comprehensive Environmental Response, Compensation and Liability Act of 1980
- RCRA: Resource Conservation and Recovery Act
- SARA: Superfund Amendments and Reauthorization Act of 1986
- PEL-C: OSHA Permissible Exposure Limit-OSHA Ceiling Exposure Limit
- TLV-TWA: Threshold Limit Value - Time Weighted Average (American Conference of Governmental Industrial Hygienists)
