

WILLIAM RAINEY HARPER COLLEGE
BUSINESS AND SOCIAL SCIENCE DIVISION
GENERAL COURSE OUTLINE

GEG Course Prefix	160 Course Number	Drone Pilot Ground School Course Title	(1 -0) Lec-Lab	1 Semester Hours
-------------------------	-------------------------	---	-------------------	------------------------

COURSE DESCRIPTION

Provides knowledge about the regulations and procedures governing the legal operation of Small Unmanned Aerial Systems (sUAS) in the United States of America. Course content aligns with knowledge areas in the Federal Aviation Administration's (FAA's) Part 107 airman knowledge test for a Remote Pilot Certificate with a sUAS rating.

TOPICAL OUTLINE

I. Regulations

- A. Registration and marking requirements
- B. 14 CFR part 107

II. Aviation Weather

- A. Aviation meteorology
- B. Effects of weather on sUAS performance
- B. Surface aviation weather observations
- C. Aviation weather reports and forecasts

III. Airspace Classification and Operations

- A. Controlled airspace
- B. Uncontrolled airspace
- C. Special use airspace
- D. Air traffic control and national airspace
- E. Airport operations
- F. Visual Flight Rules (VFR)
- G. Notices to Airmen (NOTAMs)

IV. sUAS Operations

- A. sUAS loading
- B. Maintenance and inspection procedures
- B. Emergency procedures
- C. Crew resource management
- D. Radio communication procedures
- E. Pilot performance
- F. Aeronautical Decision Making (ADM)

METHODS OF PRESENTATION

1. Lecture
2. Computer-based learning
3. Hands-on exercises

STUDENT OUTCOMES: *(The student should...)*

1. understand and explain sUAS regulations stipulated in 14 CFR part 107
2. understand registration and marking requirements for sUAS
3. understand and explain the effect of weather on sUAS mission planning and performance
4. interpret aviation weather reports and forecasts
5. identify US airspace categories and describe their use
6. identify sources of information for US airspace and aviation weather information
7. describe considerations for all aspects of sUAS operations, such as loading, emergency procedures, and crew resource management
8. demonstration an understanding of radio communication procedures
9. understand and describe fators that affect sUAS performance
10. understand and describe factors that affect the performance of remote pilots
11. demonstrate an understanding of Aeronautical Decision Making (ADM)
12. create pre and post flight checklists

METHODS OF EVALUATION

Grades are based on demonstrated proficiency in subject matter. Proficiency is determined from:

1. Quizzes
2. Exams
3. Homework
