EIT 200 E-Learning Tools & Technology

Online Course

If you are eager to explore technology used in any of the following areas, this is the course for you!

- Supporting educators or trainers
- Teaching online
- Corporate e-learning / training
- Enhancing the classroom experience

EIT 200 provides you with a foundation in the tools and technologies used to develop and support e-learning in business and education environments. You'll explore a wide variety of Web 2.0 technologies that can be used to enhance online and classroom courses, including technology tools for presentations, assessment, collaboration, creative expression, brainstorming, review games, social networking, and more.
